ABOUT US

Our main goal is to ensure the satisfaction of our customers.

SERSAN PLASTIC; is a company operating in the packaging industry with its half-century of knowledge and experience and innovative production technology, adopting customer satisfaction and high quality production as a principle, and aiming to have a say in the industry with its integrated facility located in Arnavutköy, Istanbul.

Quality-oriented packaging production, special solutions according to customers' demands, competitive price, innovative production and timely delivery policy is taking firm steps forward to its goals.

Sersan Plastik, with its young and dynamic structure, aims to realize new investment projects in order to provide the best service to its working partners, to be a follower of the latest developments in the sector, and to support its employees with innovative trainings in order to maintain customer satisfaction at all times.

Respect for people and nature is its top priority.

GRAPHIC AND DESIGN

Graphic-Design has an important place in the product promotion strategy. Our experienced designers provide all kinds of technical support for creating a new design or improving the existing design.

This stage is the process of mixing the main raw materials and the auxiliary materials that add properties to the material in measured proportions with the help of heat and pressure, and forming a film with the balloon inflation method.

EXTRUSION

FLEXO PRINTING

In our company, Polyethylene, Polypropylene, CPP, OPP, Metalized etc. up to 1600 mm width with Flexo Printing system. Films can be printed.

The films, whose extrusion, printing and lamination stages are completed, take the desired final shape at the cutting stage and are made ready for shipment.

CUTTING

SLICING

Extrusion, printing and lamination processes are completed in accordance with the customer's request, the desired size and quantity is the stage of turning the materials.

Special formula,
flexible structure.

STRETCH HOOD

No Gas
Consumption

Environmental
Product

Saving
Materials

For
All Weather

Save 30% on packaging materials and gain speed.

- It provides protection against negative effects such as rain, dust and humidity.
- It is environmentally friendly with low energy consumption.
- It saves time and material. It has an easy and fast usage feature.

Length : Optional

Width : 100 cm - 220 cm

Thickness : 20 - 450 micron

Perforated : Optional

Printing : Optional

It completely wraps the pallet and protects to products against external influences.

01.

Spreading the LDPE Film and then transferring it to the squeezing and stretching unit.
